Summary

Flutter mobile application developer with hands-on experience building real-world apps using Dart and Firebase. Developed multiple production-ready projects. Passionate about writing clean, efficient code and delivering meaningful user experiences.

Education

Bachelor of Science in Computer Science
University of Agriculture Faisalabad
Graduated: June 2026

Certificates

Certificate of CIT in Web Development at NAVTTC Pakistan

Certificate of Digital Marketing at digiskills.pk

Certificate of Freelancing at Innovista learneasy.pk

Skills

Mobile Development: Flutter, Firebase, Firestore

Tools: Android Studio, VS Code, Postman, GitHub

Languages: Dart, SQL, JavaScript, C#, C++, Python

Web: HTML, CSS, JavaScript

Soft Skills: Communication, Problem Solving, Time Management, Adaptability, Self-Learning

Work Experience

Flutter Developer Intern
AutoSoft Dynamics (Pvt.) Limited

- Enhanced and maintained **EchoSafe** (FYP), developed **Cravely** Restaurant App, and contributed to the **FWBL Digital Banking Application** by implementing features, fixing bugs, and improving application performance.
- Developed cross platform mobile applications using **Flutter**, **Dart**, **Firebase**, **Cloud Firestore**, **REST APIs**, **Provider**, **Google Sign In**, and **Firebase Cloud Messaging (FCM)**.
- Built reusable UI components, followed a structured Flutter project architecture, tested APIs using **Postman**, and collaborated with the development team using **Git/GitHub**

Finished Projects

EchoSafe – Anonymous Student Complaint Application (Final Year Project)

- Developed a secure anonymous complaint management application using Flutter and Firebase, implementing role based authentication, real time complaint management, and a user friendly interface for students and administrators.
- Enhanced and maintained the application during my internship by optimizing Firebase operations, improving application performance, refining the user experience, and resolving functional issues to ensure a reliable and scalable solution.

Cravely – Restaurant Application

- Designed and developed a cross platform restaurant application using Flutter, Firebase, REST APIs, and Provider, following a clean, modular architecture with reusable components and scalable code organization.
- Integrated Firebase Authentication, Google Sign In, Cloud Firestore, Firebase Cloud Messaging (FCM), and REST APIs, while implementing efficient state management, responsive UI, and comprehensive API testing using Postman.

Average Marks Calculator

- An interactive web tool for calculating semester GPA with dynamic subject input and instant result rendering using vanilla JavaScript.
